- Transit Number/Bank ID—this number is the nine-digit number in the bottom left corner of your check. The number to the right of the transit/bank ID on your check is your account number. (To the right of your account number, you will see your check number; DO NOT include this number as a part of your account number, as it will result in a data error with your bank and delay the receipt of your payment.)
- Include all zeros in your account number, but do not enter any special characters such as dashes or spaces. For example, if your account number is 00012-345, enter 00012345.
